Do Not Send Prevention: Curriculum

Do Not Sends are usually subjective in nature. However, there are things we as Agency nurses can do to avoid Do Not Sends.

1. Be on time to all shifts.

Be 30 to 45min early, arriving to the floor, when working at a hospital for the first time.

To ensure being on time, preparation begins the night before, or day of your night shift.

Have clothes, nursing tools, lunch etc. prepared before sleeping.

Get to bed early to ensure 8 hrs of sleep.

Awake early enough to eat before you leave for shift.

Make sure you have accurate directions and facility phone number before you begin driving to the shift.

Do not sign in and out at the same time!

Rationale: Arriving early allows the Agency nurse to familiarize themselves with the unit, get organized, meet the Charge Nurse and make a positive first impression. Signing in and out at the same time is fraud.

2. Take a detailed report.

Head to toe, system by system, Neuro to Skin.

Review your patient's charts, (ten to twenty minutes per chart) after report, and before lunch.

Rationale: This is of paramount importance! Sets the tone for the start of the shift, provides the foundation for the plan of care, focus of initial assessments and interventions.

Taking a detailed report and reviewing the pt's chart during the first half of your shift also prepares the Agency nurse to give a knowledgeable, relevant report.

3. Show Initiative.

Find the Charge nurse, introduce yourself, ask to be shown around, and inquire who your resource person may be for the shift (if initial shift @ facility), if not the Charge nurse.

Communicate early and often any relevant information to the Charge nurse such as: changes in patient condition, difficulty with or questions about; assignment, staff, equipment or documentation tools.

Rationale: Allows Charge nurse to make adjustments or provide assistance in a timely manner, in order to provide the safest patient care and prevent a delay in patient treatment.

4. Avoid handling personal business during shift.

Talking on mobile phones or using facility information systems for personal use (other than in an emergency or away from patient the care area during breaks) is a sure way to make an impression that will reflect poorly on the Agency nurse.

Rationale: This behavior often leads directly to a Do Not Send.

5. When in Rome... Make every attempt to do things, the way the Facility you are working in, does things.

Some Facilities want two nurses to sign off on all **insulin** administration, **narcotic** administration and **lab specimens**.

Please respect all of our facilities policies and procedures, without complaint or argument.

However, if you have been asked to perform a task or procedure you feel will place a patient in danger or you feel unqualified to perform, contact your immediate supervisor and/or go up the chain of command until you feel you have been able to express your concern professionally and respectfully.

If one of us as agency nurses encounters a situation in which you feel obligated to challenge a request, in order to maintain the safest patient care environment. It is of vital importance that you:

1. Communicate with Alliant Personnel Resources, LLC
2. Document the incident in your own words before leaving the facility.
3. Furnish signed and dated, copies of your documentation of the incident to Alliant Personnel Resources, LLC, the Nursing Supervisor of the facility in which you were working, and retain a copy for yourself.

Rationale: Knowledge of, and compliance with each facilities policies and procedures are fundamental elements of professionalism, providing safe patient care and creating an impression that makes a facility ask for an Agency nurse by name.

6. Practice the 6 rights of medication administration.

1. Right Patient
2. Right Medication
3. Right Dose
4. Right Time
5. Right Route
6. Right Rate
7. Right Reason
8. Right Documentation
9. Right Assessment
10. Right Education
11. Right Evaluation

If an agency nurse is confused regarding any aspect of the medication administration process, clarification with the physician becomes an immediate priority, to ensure safe medication administration.

Rationale: Medication errors are serious, and can lead to negative patient outcomes, extended hospitalization, severe injury and death. Most importantly for a careful, knowledgeable and conscientious Agency nurse, medication errors are almost always preventable.

7. Be conscious of Joint Commission National Patient Safety Goals in your practice.

1. Improve the accuracy of patient identification.
2. Improve the effectiveness of communication among caregivers.
3. Improve the safety of using medications.
4. Reduce the risk of health care-associated infections.
5. Accurately and completely reconcile medications across the continuum of care.
6. Reduce the risk of patient harm resulting from falls.

A complete and current set of National Patient Safety Goals should be posted or easily accessible on any unit in any Acute Care Facility.

Rationale: "The mission of Joint Commission is to continuously improve the safety and quality of care provided to the public" through the "support of performance improvement in healthcare organizations."

8. Ask the Charge nurse to Audit your Charting a few hours before end of shift.

Having the charge nurse review our documentation, within a couple of hours of the end of our shift, displays exceptional accountability, reduces the healthcare provider and facility's exposure to liability. Thorough documentation also helps convey important information to the following shift, and ensures the necessary facts will be available when and if the chart is reviewed in the future.

Rationale: Complete documentation, is an essential component of effective, efficient nursing. Since many Agency nurses work in multiple facilities in a short period of time, it is not an easy task to dot every "i" and cross every "t", without help from a knowledgeable source.

9. Practice excellent customer service.

Customer service extends further than our patients and their families; it includes every person we come into contact with while we are working. Our customers are every nurse, pharmacist, physician, respiratory care practitioner, etc. Every time we interact with another human being at work it is imperative that we greet that person with a friendly and helpful attitude.

Rationale: Treating our patients, their families, our colleagues and interdisciplinary team members with friendliness, respect and kindness creates an environment where being helpful and taking the extra step to solve someone's problem is not the exception but the "norm".

10. Take excellent care of your patient(s).

The reason hospitals exist is because people who are ill, injured or have had major surgery require 24-hour care. The necessity of 24-hour care is the reason why tens of thousands of hospitals across the US continue to operate, often at a loss.

Keep the person you are taking care of clean. Be gentle. Communicate kindly and effectively. Listen carefully. Show respect, for your patient's privacy, age, culture, family and human existence. Spend time teaching them, explaining what is happening at any given moment. Explain what you are doing or giving your patients and why.

Rationale: As direct patient care providers taking good care of our patients what we should expect of ourselves, it is what we are expected to do. It is our ethical obligation. It is our job.

11. Remember This! ... When we are working for a TEMPORARY Staffing Firm "We are PERMANENTLY on PROBATION"

There are common reasons many of us work for Staffing Firms. We enjoy the flexibility, often making our own schedules, increased pay, getting paid sooner, working in new environments and meeting new people. We also need to be aware that there are trade-offs or things we give away for those benefits.

We are not employees of the facilities in which we are working. We are not “on staff”. We are not members of the union. We cannot expect to receive fair treatment. We will almost never get the best assignment. We might be “ganged up” on. We might not get help as soon as we ask for it. If we complain we can expect to be asked not to return. We have to out-perform our colleagues “on staff” every shift. We can never get comfortable.

Rationale: The key to being “successful” and enjoying our careers as providers who work for temporary staffing forms... is having as many places to work as possible. Having a wide range of choices will allow us to minimize interruptions to income when our favorite places do not need us. The sooner we let go of our expectations of being treated as if we were employees of the facilities we work in, on a TEMPORARY basis the greater chances we have of being successful.
